

March 2023 Robotics Investments

Company_Name	Amount	Type	Country
1X	\$23,500,000	Series A	Norway
Aicatech AI	\$1,275,336	Seed	Switzerland
AutoSurg	\$835,000	Seed	USA
Azure Alliance	Estimate	Grant	Taiwan
Biomotum	Estimate	Seed	USA
Caracol	\$11,279,991	Series A	Italy
Chietom (Zhitong Precision)	Estimate	Other	China
Chouette	\$4,808,945	Other	France
Direct Drive Technology	Estimate	Series B	China
dRISK	Estimate	Grant	United Kingdom
Drone Delivery Canada	\$75,000	Grant	Canada
Drone Express	\$250,000	Seed	USA
Enabot	\$145,267	Other	Hong Kong
ENKITEK	Estimate	Seed	Spain
Fabrica AI	\$850,000	Seed	Singapore
Flyability	Estimate	Series C	Switzerland
Geoflex	\$6,366,419	Series A	France
Ghost Autonomy	\$45,370,440	Series E	USA
Hanyang Technology	\$14,496,535	Seed	China
Haply	\$3,496,220	Seed	Canada
Hengzhi Future	Estimate	Seed	China

Hirebotics	Estimate	Other	USA
Inker Robotics	\$1,200,000	Seed	India
IONA	Estimate	Grant	United Kingdom
Jodell Robotics	\$13,014,619	Series B	China
Lanjiang Technology	Estimate	Seed	China
LexxPluss	\$10,800,000	Series A	Japan
Manna Drone Delivery	\$10,000,000	Other	Ireland
Neubility	\$2,296,832	Series A	South Korea
Nimble Robotics	\$65,000,000	Series B	USA
Plus One Robotics	\$52,743,951	Series C	USA
Qi Yuan Robot	Estimate	Seed	China
Qiaotian Intelligent	\$1,500,000	Other	China
READY Robotics	Estimate	Other	USA
Renovate Robotics	\$2,500,000	Seed	USA
REP-TEC	\$354,811	Other	USA
Rizhao Ami Precision Control Technology	\$7,000,000	Other	China
Robeff Technology	\$1,500,000	Seed	Turkey
RoboticPlus.AI	Estimate	Other	China
sliQue Robotics	Estimate	Seed	USA
Standard Robots	\$86,575,089	Series C	China
UISEE	Estimate	Series C	China
Venti Technologies	\$28,800,000	Series A	China
Verity	\$32,802,838	Series B	Switzerland
Wingtra	\$22,000,000	Series B	Switzerland

Xingmai Innovation	\$29,077,374	Other	China
--------------------	--------------	-------	-------

Yogo Robot	Estimate	Other	China
----------------------------	----------	-------	-------

Indoor Mobile Platforms

Description

IX is developing humanoid robotics systems.

AICA offers a AI based software that simplifies the programming of robots.

Autosurg is developing an autonomous surgical robot for endoscopic diagnostic and interventional procedures.

Azure Alliance produces the Azure Fighter, an electric marine debris cleaning boat that operates by remote control or autonomously.

Biomotum produces wearable rehabilitation robotics for assisting and restoring walking function.

Caracol offers large format, robotics powered, additive manufacturing solutions for industrial sectors.

Chietom (Zhitong Precision) is a manufacturer of gear reducers for industrial robot joints

Chouette uses drones to capture images which are then analyzed to detect diseases and tree vigour and, based on the data analysis, creates the optimal spray volume of chemicals.

Direct Drive Technology provides direct drive solutions for home care robots, industrial/commercial robots, and other machines.

DRISK is developing a standardised approach for autonomous vehicle testing that incorporates the the world's most extensive library of edge case.

Drone Delivery Canada is focus on designing, developing and implementing a commercially viable drone delivery system within the Canada.

Drone Express is a full-service logistics company that uses autonomous drones for local package delivery.

Enabot produces mobile, social robots powered by artificial intelligence.

ENKITEK utilizes robotics, AI and IoT to automate and monitor the production in indoor farming.

Fabrica AI is developing an autonomous tile grouting robots that grout and clean tile gaps with only a press of a button.

Flyability is designing drones for visual inspection and exploration in indoor, often inaccessible environments for inspection and more.

Geoflex is a cloud service operator that enhances GPS/GNSS based applications to 4 centimeters positioning on land, at sea and in the air.

Ghost Autonomy produces software to enable autonomous driving in consumer vehicles.

Hanyang Technology produces autonomous service robots for indoor and outdoor use.

Haply iprovides haptic devices, prototyping, firmware, and virtual learning assistance.

Hengzhi Future is a developer of consumer-grade robotic products.

Hirebotics is a Robotics-as-a-Service (RaaS) provider.

INKER is an engineering services firm that produces robotics solutions.

IONA develops zero-emission autonomous drone solutions for logistics in low population density areas

Jodell Robotics offer electric gripping solutions for robotics systems.

Lanjiang Technology is a developer of agricultural robots for field planting management.

LexxPluss provides a customizable hybrid autonomous mobile robots (hybrid-AMR) for the logistics market.

Manna offers drone delivery as a service stack to restaurant chains, dark kitchens, and online food delivery platforms

Neubility offers a self-driving delivery robot as a service.

Nimble Robotics offers fulfillment services using intelligent robots for pick and pack operations.

Plus One Robotics develops a parcel-handling robotics platform for logistics applications.

Qiyuan Robot is a developer of intelligent cleaning robots.

Qiaotian Intelligent produces tool changers for industrial robots.

READY Robotics is the developer of ForgeOS, the industrial OS for robots and automation.

Renovate Robotics develops an automation technology for automated solar and shingle installation in the construction sector.

REP-TEC provides robotic automated recycling solutions.

Rizhao Ami Precision Control Technology iprovides precision optical-mechanical control solutions.

Robeff Technology produces fully autonomous mobile delivery systems.

RoboticPlus.AI is an robotics company that helps in architectural tech by providing intelligent robotic products for the construction sector.

sliQue Robotics is a machine learning and robotics firm specializing in solutions to optimize hospitality operations.

Standard Robots provides a variety of autonomous mobile robots..

UISEE provides a variety of autonomous mobility solutions.

Venti Technologies develops logistics systems incorporating autonomous vehicles for moving goods and people at industrial hubs.

Verity's drone based solution automates inventory checks in large warehouses and DCs.

Wingtra is a manufacturer of professional mapping and surveying drones.

Xingmai Innovation produces intelligent pool cleaning robots.

Yogo Robot uses automated delivery solutions. For last mile delivery
